PROFILE

I am a person with a great need for continuous development. At the moment I am creating software for LG company.

I create systems using the SpringBoot framework and Angular or React as needed. At the project is from the beginning, to the end. I design, program and re-image systems. In addition, I take care of legacy code in other systems.

I want to constantly expand my range of skills and improve the ones I already have.

SKILLS

- JAVA
- SpringBoot
- MySQL
- Angular
- React
- Oracle
- GIT

PORTOFLIO

TABLE FOOTBALL LEAGUE APP

App to sign up for table football league
